Thermoid Launches Transporter® Fuel Delivery Hose – Black

Dublin, OH – June 1, 2019

Thermoid, industrial rubber products manufacturer, is pleased to announce the launch of the new Transporter Fuel Delivery Hose – Black. The Transporter hose is uniquely engineered to convey a variety of common fuels for use on commercial and residential delivery trucks for fuel oil heaters. The hose features a smooth Thermalon cover to provide durability and longevity against ozone, abrasion and oil.

Thermoid's Thermocure manufacturing process provides the Transporter Delivery hose with consistent I.D. and O.D., and the in-house compounding process delivers more pure and consistent polymers to manufacturing process and end product.

The Transporter Fuel Delivery Hose – Black is the third hose to be released in the Transporter Series of hoses. The development of the hose stems from Thermoid's continuous commitment to being a solutions provider for its end-users and manufacturing value-added products.

To learn more about the Transporter Fuel Delivery hose visit www.thermoid.com, or email us at sales@thermoid.com.
